ABOUT ME

MERN Stack Developer with hands-on experience building and shipping full-stack web applications using MongoDB, Express.js, React.js, and Node.js. I work comfortably end-to-end — designing REST APIs and implementing JWT authentication on the backend, then building responsive, component-driven interfaces with React, Redux Toolkit, Next.js, and SvelteKit. I enjoy automating repetitive workflows with n8n, and I've delivered production-ready products for clients, freelance projects, and community organizations, with a focus on clean, maintainable code.

SKILLS

FRONTEND

React.js / Next.js / SvelteKit / JavaScript (ES6+) / TypeScript / Tailwind CSS / Redux Toolkit / HTML5 / CSS3

BACKEND

Node.js / Express.js / RESTful APIs / JWT Authentication / MVC Architecture

DATABASE

MongoDB / Mongoose / MySQL (Basics)

AUTOMATION

n8n / webhooks / Google Sheets sync / email dispatch

CMS

WordPress

TOOLS

Git / GitHub / Vercel / Render / Netlify / Postman / ThunderClient / Figma

WORK EXPERIENCE

🏢 **Lynt-X Global** – Chennai, India

Website: <https://www.lyntxglobal.com/> | Email address: jascar.bp@lyntxglobal.com

MERN Stack Developer

[02/04/2026 – Current]

- Build and maintain full-stack web applications across the MERN stack (MongoDB, Express.js, React.js, Node.js) and SvelteKit for client-facing platforms.
- Develop RESTful APIs, JWT-based authentication, and third-party CRM and webhook integrations.

- Build responsive, component-based user interfaces with React, Redux Toolkit, and Tailwind CSS.
- Collaborate with the team through Git, code reviews, and Agile workflows to ship features on schedule.

Neural Nest Solutions (Remote) – India

Website: <https://www.neuralnestsolutions.com/>

UI/UX Developer

[02/04/2024 – 24/10/2025]

- Designed user interfaces for web and mobile applications.
- Collaborated with developers to enhance user experience across platforms.

PROJECTS

[04/2026 – 06/2026]

St. John's Carol Union — Web Platform & CMS · SvelteKit 5 + Node/Express + MongoDB

- Designed and built a production-deployed full-stack web application and custom CMS for a choir ministry — 12 dynamically managed homepage sections and 14 admin modules, fully editable by non-technical administrators.
- Built the backend in Node.js, Express.js, and MongoDB with JWT authentication, role-based access control, and Cloudinary media storage; developed the frontend in SvelteKit, TypeScript, and Tailwind CSS with GSAP and Lenis animations.
- Integrated a live AI chat assistant (Groq) grounded in real-time database content, Resend transactional email with branded templates, and AES-256-GCM encrypted API-key storage.
- Shipped audition management with public applications, testimonial moderation, a 6-stage production pipeline, and full SEO (sitemap, Open Graph, geo tags); deployed on Netlify and Render.

[01/2026 – 04/2026]

SJC Asanam Receipt Generator · SvelteKit + MERN + n8n

- Built a full-stack donation management system for a church committee — handles donor entries, auto-sequential receipt numbering (SJC260001 format), bilingual Tamil/English PDF receipts, email dispatch, and live Google Sheets sync.
- Built the backend in Express.js and MongoDB with JWT authentication, Puppeteer-based PDF generation, and ExcelJS reporting; developed the frontend in SvelteKit and Tailwind CSS.
- Integrated n8n automation workflows for dual-write to MongoDB and Google Sheets, automated email delivery with PDF attachments, and update/delete synchronization.
- Implemented Tamil transliteration (Google Input Tools with AI4Bharat XLIT fallback), India Post office city autocomplete, a floating calculator, advanced filtering, and a real-time analytics dashboard.

[2025]

Health & Wellness App · MERN Stack

- Developed a full-stack MERN application (MongoDB, Express.js, React.js, Node.js) with secure JWT-based authentication, featuring fitness tracking, nutrition logging, and goal management.
- Built a responsive, mobile-first user interface with React and Tailwind CSS, and integrated real-time data fetching and caching with React Query.

[09/2025 – 10/2025]

Movie Review App · MERN Stack

- Engineered a full-stack movie review application with OMDb API integration and user authentication.
- Implemented movie search, detailed views, star rating systems, and persistent data storage with MongoDB.

[09/2025 – 10/2025]

Invoice Management System · React + Redux

- Built a responsive invoice management application using React.js, Redux, and Tailwind CSS, with automatic calculations and PDF download
- functionality.
- Managed state efficiently using Redux and custom hooks; built modular components for maintainability.
